

Initials in different alphabets

We may not realise it, but our initials are an essential part of who we are. They help us identify ourselves throughout our lives, where we sit at school and whether mail is intended for us. This learning activity is designed purely for you to have a bit of fun with your initials.

What do your initials look like in different alphabets or symbolic languages? Take some time to explore different languages and alphabets. If you're not sure where to start, you could look at Greek, Mandarin and Russian, but there are many more you could explore.

Draw your initials in another language or alphabet in the space below and make them as pretty or intricate as you like. How do they compare to your initials in your native language or alphabet? Are they pronounced any differently?
